[Special to the N. Y. Courier des Etats Unis.]
Paris, Aug. 22.—Preparations for a combat are being mede all along the line. Paris is virtually in a state of seige, and every one ac-cepts this part of the situation. It is generally conceded that the issue of the campaign will be decided under our walts, if we are able to hold out for a week, And we are able against an enemy destitute of material for able to hold out for a week, And we are able against an enemy destitute of material for carrying on a seige; all France will come to the succor of the capital, and will severely amony its beseigers. As for a diversion in their favor, among the Foubourgs, they seed not count for it, for at this time it would be difficult to restrain the summary vengeance of any individual convicted of treason. I visited, this morning the line of fortifications between Neuilly and Auteil. An army of workmen, aided by the Garde Mobile and men of the military classes, were at work outling trees. aided by the Garde Mobile and men of the military classes, were at work cutting trees. The Bois de Boulogne, as far as the lake bestions, is supplied with mortar batteries. Cannon of very heavy caliber have been mounted on the ramparts and scross the roads; diawbridges have been thrown on the side of the city toward Passy and Autel; a large number of houses have been demolishments. d—in short, this Part of Paris, once so beau iful, is entirely unrecognizable. On the Vin

The New York Times declares that our effort, to nationalize and liberalize the Democratic elements has been attended with sundry manifestations of success, but it regards these as mere surface indications, and thinks that, in spite of our preaching and teaching, the Bourbonism of Democracy will remain in the ascendant, as a matter of fact, and that upon all essential points it will continue to rule The whole Southern country was reased to nameros borealls last week. The village pa-pers lave some gualing descriptions of it. Mr. J. C. Stanton, who hered 1,000 Chaines-borers to work on the Alabama and Chaite-toografilroad, is very well satisfied with his all essential points it will continue to rule

all essential points it will continue to rule the party.

That our fight against ignorance and error and in behalt of free opinions and a national, broad-minded and patriotic spirit has resulted in the most sudden and surprising development of liberalism is sufficiently obvious. But the Times is mistaken in characterizing the responses which we have stirred up as superficial and politic, and it gives us more than our due when it speaks of our course as bold and hazardous. It is never hazardous to speak the truth, and we are disposed to claim no especial courage for having made an earnest against of last week by climbing down the lighting-row whilst the guard was askep in the next room.

Mr. William Maupir, a young citizen of Charicticeville, Va., has enddenly disappeared. He went into the tobacco ground to work on Monday morning has, since which the country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of our lellow-citizens which disasters and oppressions have so country in the hearts of the Country the level our country. believe it mistakes both the sature of the Southern heart and the ancounties of the political situation. It will learn before the contest is over, and the people of the North will learn also, that if a period rerioration of peace and union is withheld it will not be the fault of the South. It will be the fault of Radical legislation designed to obstruct the progress of popular reunion and to corrupt the very fountains of peace. The Democratic party is the only party in the country which has the ear and confidence of the Southern people. It has not procuribed them. The Republican party has neither their ear nor their confidence, and never will have, because it has procuribed them. But hitherto the negro question has raised up a practical obstruction to the reunion of the Democratic elements North and South. It was the negro question that divided the Democratic party in 1800. The division was bitter, and, in spite of ten years of chastening, the party has been in but indifferent acand, in spite of ten years of chastening, the party has been in but indifferent ac-cord. The negro question out of the way, and the spirit of nationality thoroughly aroused, will place the Democratic party where it was in the days of its power and glory—the only national party in the land —and when that magnificent spectacle of periest partisan reunion is reached—the

pirited persons who, by age or disappoint-ment, have lost their vitality and their enterprise, as well as their hold on the situation, or else they are merely local office-holders and office-seekers, who are gred-hot because red-hotism seems to indicate that species of zeal which they regard as necessary, and which in second-rate men really is neces-sary, to local office getting or local office-holding. The first class amounts to noth-ing. It is too weak and morose to affect ess of that robust activi more noisy, but will prove almost as teeble.

Made up of timid though boisterous percons, devotees of bread and butter, who talk in loud and meaningless terms about be in anybody's way when the current sets. They will swear they have been that way all the time; and thus, as the Demo-

cratic party, being in general out of power, has but lew office-holders, it has tew Bourbons, and the outside pressure upon those will be tremendous. They will do any thing to get office or to keep office. Government with them means bread and butter. In Kentucky, for example, they patronsge, and, therefore, they appeal to local prejudices. But behind them there is a great mass of disinterested patriotism and unselfish intelligence, which cares noting about bread and butter, but wants

I a peaceful, constitutional, honest, cheap
de and equal administration of the governan' ment. The force of this, urged by kindred
and elements outside of Kentucky where there

has been no local patronage to encrust me in office and Bourbonism, must inevitable campaign, and the Bourbons. that is the bread and butter people, will place them-selves agrees the line of march at their own peril. In a word, the Democratic party is out of office and can afford to be liberal. It has few offices to defend, and, therefo has sew omces to desend, and, therefore, few Bourbons to carry, and resting its claims to the confidence of the people upon its offer of a platform liberal enough to hold all the anti-radical elements, it must, in its nature and condition, become more and more magnanimous and rational, in short, a tolerant all foretwine marks. short, a tolerant, all forgiving party of

It is otherwise with the Republicans. As the Democratic organization is in Ken-tucky so is the Republican organization in all of the Northern States where it prevails, and likewise at Washington, that is, thor-oughly red-hot and radical. The New York Times is making an effort to moder-ate it. If the Times will not consider it a merely bandying its own words, we will say that its effort will prove as unsuccess-tul as it thinks ours will be, and for the reasons specified. It is not easy to libers ize a party in power, but particularly party which owes its power to its illibes aliem. Adversity has taught the Democ racy self-denial, torbearance and discretion. Prosperity and maladministration, joined together, have only tended to rether, have only tended to render the publican leaders domineering and over-addent. The Times says we will never moderate Kentucky. We frankly confess that we never expect to moderate those Kentuckians who hold office by an old ocal tenure until the solid masses of Ken iocal tenure until the solid masses of Ren-tucky move to the music of the great na-tional impulse which is coming, like a sun-rippled wave, over the whole people, North and South. Then the oldest of the Bourbons—the old king-bee Bourbon of them all—will catch new lite and fly from rock to rock with the nimblest of the Dean-cratic sargies. But take the most red-hot ocratic eagles. But take the most red-hot of all the Kentucky Bourbons, now in of all the Kentucky Bourbons, now in office, and there are but iew of these after all, and we have a fac-simile of thousands of Radical leaders in the North, who are ultra sad unchangeable in their Radicalism because ultraism has hitherto paid; because proscription is the foundation stone of the Republican tenure. Men will not be moved from such a spirit short of an earthquake. It is a good rule to let well enough alone, and hence parties never re-

form in office. Reforms come from without, not from within. The effort to consolidate all the anti-Radical elements on a broad National Democratic platform—suited to 1870 and not patched together by the debris of 1860 not patched together by the debris of 1860—
is easy, because it is necessary, and mea of
sense everywhere see it. But the reorganization of the Republican party, and the
modification of the Republican spirit, already in power and in line of battle, is a diferent affair, and we think the Times will
find it so before, it is done with General
BUTLER and Governor MORTON, to say
nothing of Mr. SUMNER and WENDELL
PHILLIPS. It will find that the real redhot Bourbonism of the country is with its
own party, hedged as it thinks itself in
power and moss-grown with the confidence
and corruption et ten years of irresponsible
administration. Just as we find it difficult
to moderate a majority of 50,000 in Kentucky, because, knowing themselves secure here, they can not see why it should
not be so everywhere, will Gen. Butlen

ticost, with the white stripes running gonally across." LOUISVILLE CHEMICAL WORKS. Enlargement of the Establishment and Extension of Business—A New and Important Branch of Manulac-ture.

and Important Branch of Manufac-ture.

The Louisville Chemical Works, which have recently hear re-established under such favora-ble ampices, are to be greatly exterged. The business of the establishment is to be extended, to such an extens that the capacity will be about doubled. A new branch of manufacture will be introduced which will supply a want that has long been felt in this city—namely, the manufac-ture of sulphurfe actd. The ground has already been braken for the erection of the new buildings required and a large proportion of the additional stock needed has been subscribed. The acid works will be creeted in the rear of the present buildings, and the capacity of the new works is estimated at 18,000 carboys per annum. To show the importance of this emterprise, it is only necessary to say that no less than 0,000 carboys, of said age-used per annum in this city alone, to say nothing of the large quantities ship-ped through this city to all parts of the South, it is no more extressively used than is supposed by those who are not laminers in the trude. B

steen and celly so perfectly adapted to the busisees.

We are told that a carboy of sulphuric acid is
worth \$4 50 in Cincinnal, the nearest point
from which it can be obtained: that it costs fifty
cents to pack it, fifty cents freight to bring it here
and affect cents to return the empty carboy,
making it worth a follier and fifteen conts more
here than it is worth in Cincinnali, while the
material used for its mannfacture many pass
through Louisville to reach Cincinnanis. It will
be seen at once that wort recorrabited political
wiff emable the company to mannfacture and at
a much less cost to the consumer than it can be
purchased in Glacunnal; und even if the acid
abound be seld an cost in the latter place, the Louiavifie works will be able to compete with Cincinnat and still realize a handsome profit.

A limited amount of stock is, the enterprise
may be purchased by those destring to make a
good fivestment of a small smoora of money.
Finas, specifications and estimates, which will
prove to hand one that the investment will be a
said and indictious one, may be seen at the office
of the Louisville Chemical Works.
